

Best Practices Poster Session at 2007 Statewide Directors Conference

This year's conference will feature an opportunity for every participating program to share a "best practice" idea with other conference participants. Using an example shared at the BTSA Directors' Academy, El Dorado BTSA Induction program might share their Site Administrators' Breakfast with a description, pictures of this year's event, the agenda, testimonials, etc. Ideas are limited only by your imagination!

Programs will bring their information and prepare their display board at the conference. A preparation room will be available on the second floor of the hotel. The program director will pick up his/her display board in this room and prepare the poster before their assigned display time at the conference. The preparation room will have basic supplies available (i.e. glue, scissors, etc.) and will also house the posters ready for their display time.

Poster board size 36" x 48" with a header panel that clips on the top

Layout:. Two panels' content will be uniform:

- the header panel must have the program name
- the middle top panel must be the Best Practice Description.

The remaining five panels may be used as they wish.

Color: All display boards are white while the header panels are blue, green, yellow, red, and orange
